Once you convert your file (ie, ppt with voice over) to video file, Open Office 365 (on Dawson Portal). Click on Stream.

Click on Create, Upload Videos.

Drag and drop your video file.

It is being uploaded. It takes a few minutes depending on the file size. The red line shows that uploading is in progress. You can also see in the box below how much of the file has uploaded.

Once the uploading is finished, click on It publishes only to your collection of videos. No need to give permissions to people at this moment, so skip this process. Office 365 is setup only with email addresses of your domain ie. dawsoncollege.qc.ca. NOTE: Although many of the students are registered on your Moodle course with emails other than Dawson College one, they all have Dawson email accounts. In order for anyone to sign in to Office 365, everyone enters their email address and password (which is the same as the one used to sign onto Omnivox). For tose who never used Office 365 and Office 365 does not appear on their Dawson Portal, see instructions to follow at the end of this document (on page 7).

When it is published, go to My Content.

Under My Content, dick on Videos and it will show you the list of your videos. To get the link to your video, dick on Edit icon.

Now you need to decide who you are going to give permissions to view your file. By default, the box just under is checked (Allow everyone in your company to view this video). This means that everyone with Dawson College email can view it (including all Dawson employees). If you do not want that, uncheck it. If you uncheck it, no one has access, including your students. Therefore, you will need to create a group of your students manually. Click in the box Search for your groups, Create a group.

It will bring you to the screen below. Name your group, search for student name one at a time (by entering first name, all at Dawson with this name will appear, dick on the one you want). Continue until all your students are in the group.

Now, you are ready to Copy the link, which you can upload to your Moodle course. When on Moodle, turn editing on, Add activity or resource, add URL and paste the link. You are done!!!

If you checked Display (see the previous slides) student can access the video on 3 ream as well.

Instructions on how to access Office 365 (if you cannot find it on your Dawson portal)

From main Dawson College home page, go to the pulldown menu; from there go to and then to .

Once you are in the Information Systems and Technology section, go to and look for . Follow the instructions on how to access Office 365 and the format for your Dawson College email.

Once you see Office 365 on your Dawson portal, dick on it, you will be asked to enter your Dawson email and the password (the same as Omnivox one), all the apps will appear (Word, Excel, PowerPoint etc.). If you do not see Stream app (the screenshot below has it), dick on the square of dots and all Office 365 apps will appear.

Choose Stream app, by dicking it will appear with the all the other ones.
