

iPhone/iTouch User Guide

Information Systems and Technology

Dawson College

v0.2, 22 July 2009

Wireless configuration ~~and~~ strongly recommending Bone software

3.0, because it includes an option in Safari to remember form names and passwords, which means you won't have to retype your username

Once the settings are working, you can select the desired items (Calendar, Contacts and/or Mail) to synchronize with Exchange.
